

Ice Management

ICE MANAGEMENT ADVANTAGES

What is ice management? It is the regular shovelling of the ice cubes stored in the storage bin where the ice produced by the machine falls. This simple gesture can bring enormous benefits for both the machine and the product.

BENEFITS OF ICE MANAGEMENT

Makes full use of ice storage bin capacity.

Avoids machine downtime due to ice cubes stuck in unnatural positions.

Prevents objects from being left inside the ice bin that could damage the machine.

Facilitates the breaking and dismantling of the ice cube slabs that fall into the store.
